

BOC ONYX

FOR STAINLES STEEL

BLACK OXIDE COATING

BOC APPLICATIONS:

- for large surfaces and small details

if it is steel, it can be processed. Chemical black oxide coating is suitable treatment for almost all kinds of steel surfaces. Each of the finishing options we provide will result with surface that is not possible to achieve in any other coating method. The target can be of any shape, straight, curved, open cut or bent steel. We are able to work with objects of multiple forms and sizes.

Maksimum size

L 2200 mm

W 500 mm

H 1000 mm

Substance strength

0.8 mm >

Care instructions:

Cleaning with a warm water and all-purpose detergent, if necessary. We recommend wiping lint-free cleaning cloths, e.g. microfiber cloth.

Black oxide coating is living coating. Every end result is unique. There might be shade differences in brochures due to printing techniques.
